Отчет по
ЛАБОРАТОРНОЙ РАБОТЕ №6
Написание тестовой документации. Использование Selenium для
тестирования веб-приложений.

Подготовил:
Студент гр. 010101
Листванович А.А.

Кабариха В.А.

Минск 2023

Test Case ID	TC_001	Test Case Description	Test the Login Functionality with valid credentials		
Created By	A. Listvanovich	Reviewed By	V. Kabarikha	Version	v0.0.6
Tester's Name	A. Listvanovich	Date Tested	13-Nov-2023	Test Case (Pass/Fail/Not	Pass
S #	Prerequisites:		S #	Test Data	
1	Access to Chrome Browser		1	username = user	
2			2	password = 617883d5-f8b6-4772-b48d-503d0ad65cfe	
Test Scenario	Verify on entering valid username and password, the customer can login				
Step #	Step Details	Expected Results	Actual Results		Pass / Fail / Not executed / Suspended
1	Navigate to http://localhost:8080/login	Site should open	As Expected		Pass
2	Enter username & password	Credential can be entered	As Expected		Pass
3	Click "Sign in"	Cutomer is logged in	As Expected		Pass

Test Case ID	TC_002	Test Case Description	Test the Login Functionality with invalid credentials		
Created By	A. Listvanovich	Reviewed By	V. Kabarikha	Version	v0.0.6
QA Tester's Log					
Tester's Name	A. Listvanovich	Date Tested	13-Nov-2023	Test Case (Pass/Fail/Not	Pass
S #	Prerequisites:		S #	Test Data	
1	Access to Chrome Browser		1	username = wrong_user	
2			2	password = simpleqwerty	
Test Scenario					
Verify on entering invalid username and password, the customer can not login					
Step #	Step Details	Expected Results	Actual Results		Pass / Fail / Not executed / Suspended
1	Navigate to	Site should open	As Expected		Pass
2	Enter username & password	Credential can be entered	As Expected		Pass
3	Click "Sign in"	"Bad credentials" error	As Expected		Pass

Test Case ID	TC_003	Test Case Description	Test number flipper function with valid data		
Created By	A. Listvanovich	Reviewed By	V. Kabarikha	Version	v0.0.6
Tester's Name	A. Listvanovich	Date Tested	13-Nov-2023	Test Case (Pass/Fail/Not)	Pass
S #	Prerequisites:		S #	Test Data	
1	Access to Chrome Browser		1	username = user	
2			2	password = 617883d5-f8b6-4772-b48d-503d0ad65cfe	
			3	number = 123456	
Test Scenario	Verify that number flipper is returning correct number				
Step #	Step Details	Expected Results	Actual Results		Pass / Fail / Not executed / Suspended
1	Navigate to http://localhost:8080/login	Site should open	As Expected		Pass
2	Enter username & password	Credential can be entered	As Expected		Pass
3	Click "Sign in"	Cutomer is logged in	As Expected		Pass
4	Enter number to "number flipper" data	Number can be entered	As Expected		Pass
5	Click "Flip number"	Flipped number (654321) appears	As Expected		Pass

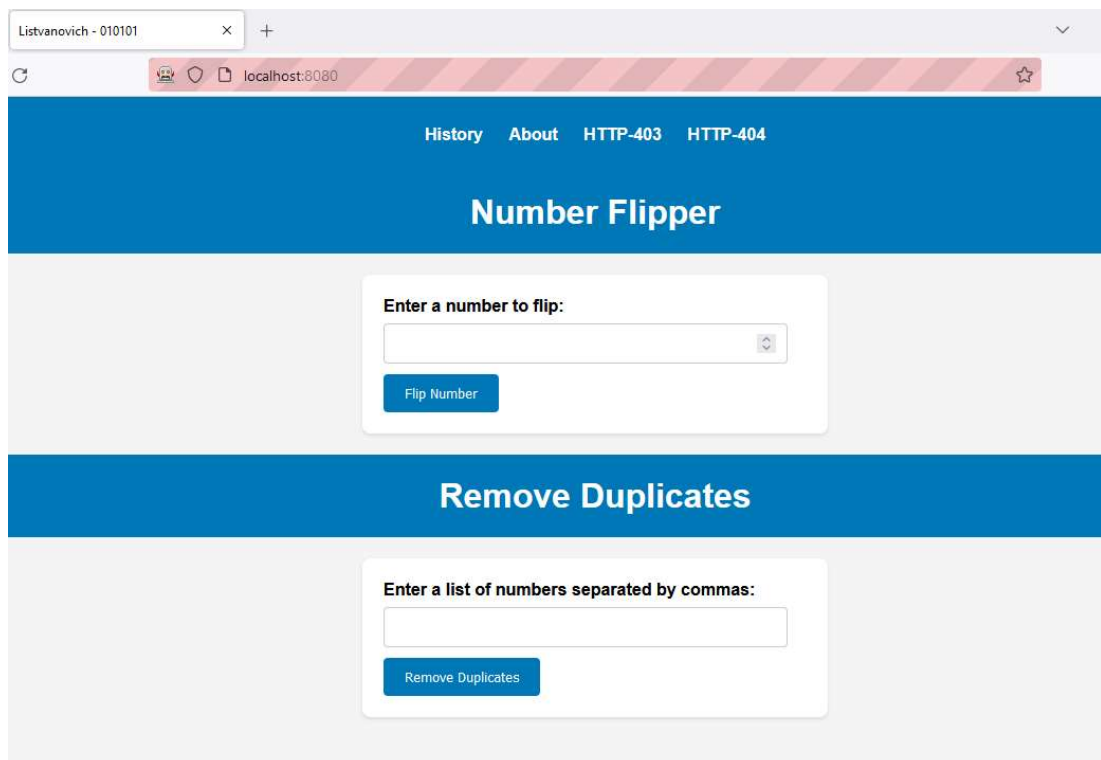

Test Case ID	TC_004	Test Case Description	Test number flipper function with invalid data		
Created By	A. Listvanovich	Reviewed By	V. Kabarikha	Version	v0.0.6
Tester's Name	A. Listvanovich	Date Tested	13-Nov-2023	Test Case (Pass/Fail/Not)	Pass
S #	Prerequisites:		S #	Test Data	
1	Access to Chrome Browser		1	username = user	
2			2	password = 617883d5-f8b6-4772-b48d-503d0ad65cfe	
			3	number = 9999999999999999	
Test Scenario	Verify that number flipper is returning correct number				
Step #	Step Details	Expected Results	Actual Results		Pass / Fail / Not executed / Suspended
1	Navigate to http://localhost:8080/login	Site should open	As Expected		Pass
2	Enter username & password	Credential can be entered	As Expected		Pass
3	Click "Sign in"	Cutomer is logged in	As Expected		Pass
4	Enter number to "number flipper" data	Number can be entered	As Expected		Pass
5	Click "Flip number"	Loader spins infinitely	As Expected		Pass

Test Case ID		TC_005	Test Case Description		Test "Remove duplicates" function with valid data		
Created By		A. Listvanovich	Reviewed By		V. Kabarikha	Version v0.0.6	
Tester's Name		A. Listvanovich	Date Tested		13-Nov-2023	Test Case (Pass/Fail/Not) Pass	
S #		Prerequisites:		S #		Test Data	
1		Access to Chrome Browser		1		username = user	
2				2		password = 617883d5-f8b6-4772-b48d-503d0ad65cfe	
				3		payload = 1, 1, 2, 3, 4, 4, 5, 2	
Test Scenario		Verify that "Remove duplicates" is returning correct result					
Step #	Step Details		Expected Results		Actual Results		Pass / Fail / Not executed / Suspended
1	Navigate to http://localhost:8080/login		Site should open		As Expected		Pass
2	Enter username & password		Credential can be entered		As Expected		Pass
3	Click "Sign in"		Cutomer is logged in		As Expected		Pass
4	Enter payload to "remove duplicates" data		List can be entered		As Expected		Pass
5	Click "Remove duplicates"		List [1,2,3,4,5] appears		As Expected		Pass

Test Case ID	TC_006	Test Case Description	Test "Remove duplicates" function with invalid data		
Created By	A. Listvanovich	Reviewed By	V. Kabarikha	Version	v0.0.6
Tester's Name	A. Listvanovich	Date Tested	13-Nov-2023	Test Case (Pass/Fail/Not)	Pass
S #	Prerequisites:		S #	Test Data	
1	Access to Chrome Browser		1	username = user	
2			2	password = 617883d5-f8b6-4772-b48d-503d0ad65cfe	
			3	payload = random,string	
Test Scenario	Verify that "Remove duplicates" doesn't work for invalid data				
Step #	Step Details	Expected Results	Actual Results		Pass / Fail / Not executed / Suspended
1	Navigate to http://localhost:8080/login	Site should open	As Expected		Pass
2	Enter username & password	Credential can be entered	As Expected		Pass
3	Click "Sign in"	Cutomer is logged in	As Expected		Pass
4	Enter payload to "remove duplicates" data	Payload can be entered	As Expected		Pass
5	Click "Remove duplicates"	Loader spins infinitely	As Expected		Pass

TC_001.py

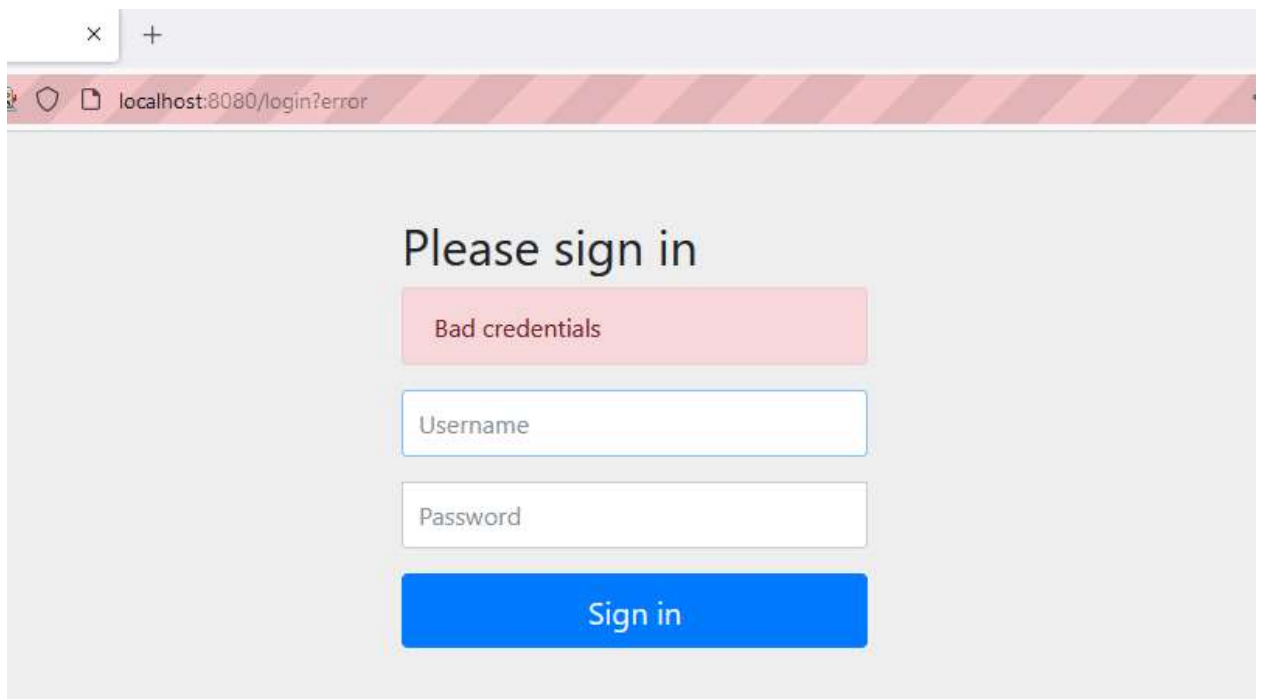

```
from selenium import webdriver  
from selenium.webdriver.common.by import By  
from cfg import username, password  
  
browser = webdriver.Firefox()  
browser.get('http://localhost:8080/login')  
username_field = browser.find_element(by=By.ID, value='username')  
password_field = browser.find_element(by=By.ID, value='password')  
username_field.send_keys(username)  
password_field.send_keys(password)  
submit_button = browser.find_element(by=By.CSS_SELECTOR,  
value='button.btn-primary')  
submit_button.click()
```

Результат выполнения TC_001.py

TC_002.py

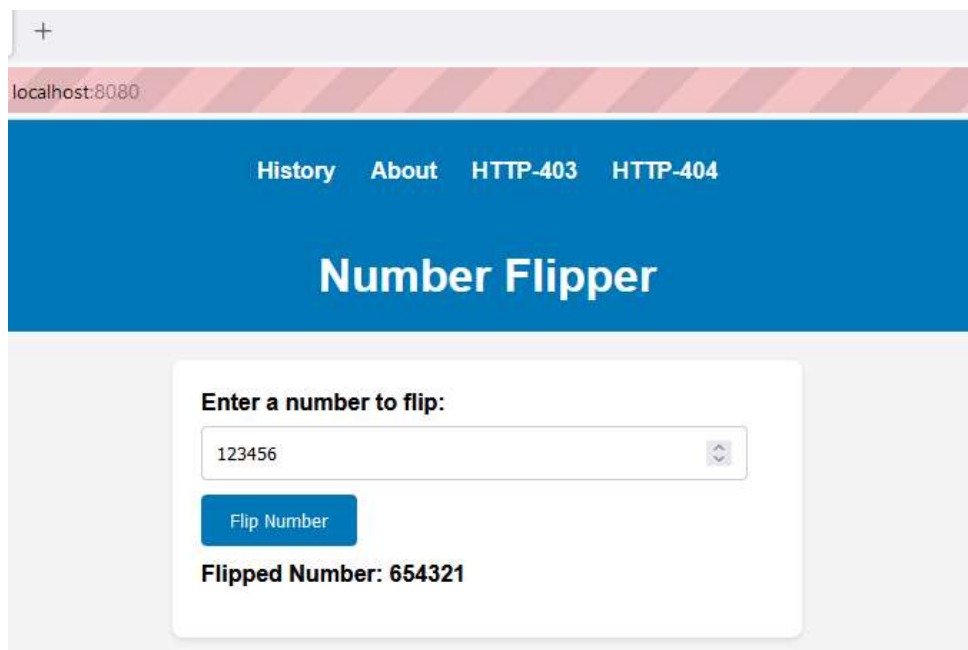

```
from selenium import webdriver  
from selenium.webdriver.common.by import By  
  
browser = webdriver.Firefox()  
browser.get('http://localhost:8080/login')  
username_field = browser.find_element(by=By.ID, value='username')  
password_field = browser.find_element(by=By.ID, value='password')  
username_field.send_keys("wrong_user")  
password_field.send_keys("simpleqwerty")  
submit_button = browser.find_element(by=By.CSS_SELECTOR,  
value='button.btn-primary')  
submit_button.click()
```

Результат выполнения TC_002.py

TC_003.py

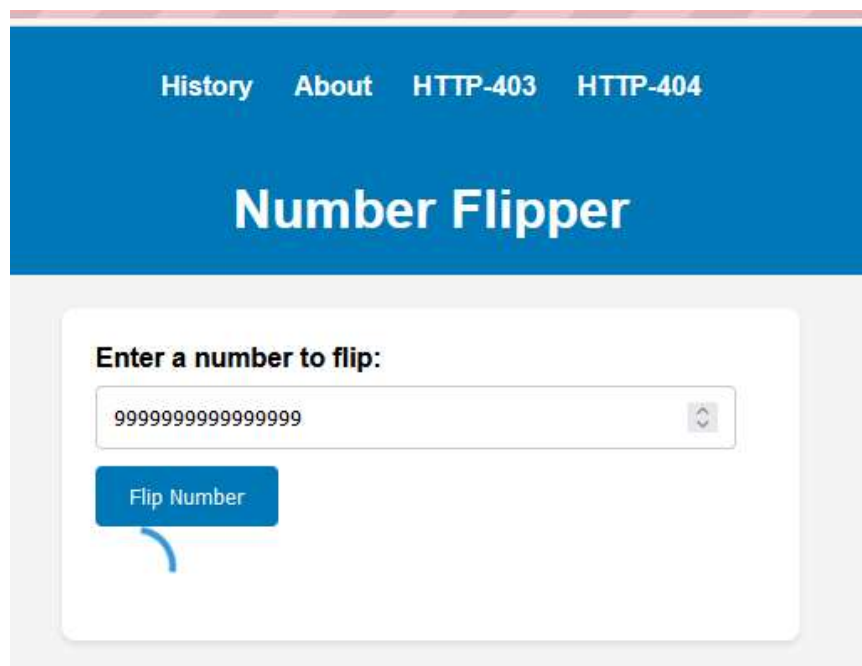

```
from selenium import webdriver
from selenium.webdriver.common.by import By
from cfg import username, password
browser = webdriver.Firefox()
browser.get('http://localhost:8080/login')
username_field = browser.find_element(by=By.ID, value='username')
password_field = browser.find_element(by=By.ID, value='password')
username_field.send_keys(username)
password_field.send_keys(password)
submit_button = browser.find_element(by=By.CSS_SELECTOR,
value='button.btn-primary')
submit_button.click()
number_to_flip_input = browser.find_element(by=By.ID, value='numberToFlip')
number_to_flip_input.send_keys('123456')
flip_button = browser.find_element(by=By.ID, value='btn_flipNumber')
flip_button.click()
```

Результат выполнения TC_003.py

TC_004.py

```
from selenium import webdriver
from selenium.webdriver.common.by import By
from cfg import username, password
browser = webdriver.Firefox()
browser.get('http://localhost:8080/login')
username_field = browser.find_element(by=By.ID, value='username')
password_field = browser.find_element(by=By.ID, value='password')
username_field.send_keys(username)
password_field.send_keys(password)
submit_button = browser.find_element(by=By.CSS_SELECTOR,
value='button.btn-primary')
submit_button.click()
number_to_flip_input = browser.find_element(by=By.ID, value='numberToFlip')
number_to_flip_input.send_keys('9999999999999999')
flip_button = browser.find_element(by=By.ID, value='btn_flipNumber')
flip_button.click()
```

Результат выполнения TC_004.py

TC_005.py

```
from selenium import webdriver
from selenium.webdriver.common.by import By
from cfg import username, password

browser = webdriver.Firefox()
browser.get('http://localhost:8080/login')
username_field = browser.find_element(by=By.ID, value='username')
password_field = browser.find_element(by=By.ID, value='password')
username_field.send_keys(username)
password_field.send_keys(password)
submit_button = browser.find_element(by=By.CSS_SELECTOR,
value='button.btn-primary')
submit_button.click()
numbers = browser.find_element(by=By.ID, value='numbers')
numbers.send_keys('1, 1, 2, 3, 4, 4, 5, 2')
flip_button = browser.find_element(by=By.ID, value='btn_removeDuplicates')
flip_button.click()
```

Remove Duplicates

Enter a list of numbers separated by commas:

Remove Duplicates

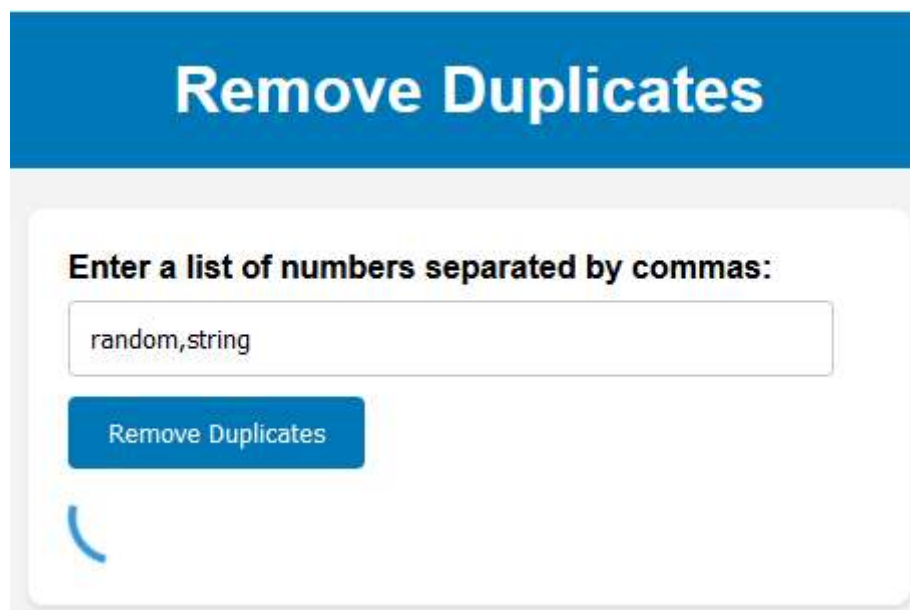

Unique Numbers: 1, 2, 3, 4, 5

Результат выполнения TC_005.py

TC_006.py

```
from selenium import webdriver
from selenium.webdriver.common.by import By
from cfg import username, password

browser = webdriver.Firefox()
browser.get('http://localhost:8080/login')
username_field = browser.find_element(by=By.ID, value='username')
password_field = browser.find_element(by=By.ID, value='password')
username_field.send_keys(username)
password_field.send_keys(password)
submit_button = browser.find_element(by=By.CSS_SELECTOR,
value='button.btn-primary')
submit_button.click()
numbers = browser.find_element(by=By.ID, value='numbers')
numbers.send_keys('random,string')
flip_button = browser.find_element(by=By.ID, value='btn_removeDuplicates')
flip_button.click()
```

Результат выполнения TC_006.py
